2018 A-6 Bell Change (Journeyman Event)

Mean Time: 8 Minutes
Drop Dead Time: 12 Minutes

Event Summary:

This is a dead and grounded event. The construction Spec will be single-phase straight-line double dead-end. There will be a jumper across the top of the pole, tied in on the pole top pin. The Journeyman will change out both multiskirts.

Event Specifications:

1. The line will be #2 ACSR
2. Web hoist with grip/grips must be used (Strap cannot be put in a position that could damage it)
3. The Journeyman will have a 5-minute set up time. In this time the Journeyman can prepare materials and ask any questions
4. Journeyman is required to bring and use their own handline, hoist, nose bag and tools. No straight lines will be allowed.
5. All material will go up and down in a nose bag.
6. Time starts at the judge's signal
7. Journeyman is required to transition over the neutral.
8. Time stops when the Journeyman has both feet on the ground.
9. After time has stopped, fall protection will be checked before the Journeyman unbuckles from the pole.
10. All PPE must be worn when you are at the event station
